SUMMARY

Dedicated Software Developer with around 1 year of experience specializing in full-stack web application development, proficient in **.NET**. Skilled in writing clean, optimized code to enhance web application performance. Experienced with **Databases, REST APIs, and MVC frameworks** to deliver efficient, high-quality solutions. Actively engaged in continuous learning to expand and refine my skill set.

SKILLS

Languages	: JavaScript, C Sharp, HTML, CSS
Frameworks	: .NET MVC, .NET Core, Express, Node.js
ORM	: Dapper, Entity Framework
Libraries	: Linq, Kendo, Material, React.js, Redux, React Router
Databases	: SQL Server, MySQL, MongoDB
Dev Tools	: Visual Studio Code, Visual Studio, Postman, SSMS, Git, GitHub

EXPERIENCE

Associate Software Developer Jul 2024 – present

General Diagnostics International PVT LTD

- Developed a web interface to manage lab machines, enabling activation/deactivation by tests and locations, and streamlined record management. Implemented repository services design pattern within an MVC architecture.
- Implemented Entity Framework with DbContext for database interaction and developed Web APIs for logistics and franchise mobile applications. Implemented automated email and WhatsApp notifications to users.
- Designed and implemented a website using .NET Core, allowing franchises to manage test prices, users, and customer slots, streamlining the booking and testing process with their clients.

Software Developer Intern Dec 2023 – June 2024

Systemics Solutions

- Built responsive web interfaces with HTML, CSS, JavaScript, and Angular, including mobile apps using Angular and Ionic for enhanced user experience.
- Designed relational schemas and managed databases using SQL and ORM frameworks, developing modular MVC architecture with custom BLL and DLL layers. Developed APIs in .NET for seamless mobile application integration.

React Frontend Developer Intern Sept 2023 – Nov 2023

Creto Technologia PVT LTD

- Developed reusable React components with efficient use of hooks for data flow, implemented API calls with shimmer UI for loading states, managed state with Redux, and handled routing with React Router.
- Enabled real-time chat using WebSocket. Enhanced and developed APIs using Node.js to showcase website features, bid placements and gig management, with JWT-based user authentication to ensure secure access.

EDUCATION

University of Mumbai

Bachelor of Technology in Information Technology

CGPA :- 9.40

PROJECTS

General Diagnostics Website *Technology Used:- HTML, CSS, JS, kendo mvc, Jquery, Ajax, .NET MVC, Mysql*

- A website that supports both client-facing and in-house operations, providing services to other healthcare domain clients. The platform is used for **managing** test records, patient details, and laboratory data, ensuring **streamlined data handling** and efficient service delivery.
- Created new features and optimized existing features of the web and **database management** for records.

Customization in AuctionWorx Website *Technology Used:- HTML, CSS, JS, Jquery, Ajax, .NET MVC, SQL Server, Angular*

- Developed seller and admin interfaces for managing custom discount coupons in **AuctionWorx**, allowing admin oversight and coupon adjustments at checkout.
- Built a mobile app using Angular and Ionic, ensuring responsive design for compatibility across all devices.

Momento *Technology Used:- HTML, CSS, Material UI, React JS, Node.js, Express.js, Mongo DB* [Live Link](#) [Source Code](#)

- **A Social Media Application** - Developed a platform for users to connect, share moments with photos, and engage in real-time chat using Socket.io.
- Utilized Multer for photo storage, managed state with Redux, and enhanced UI with Material UI icons and widgets. Utilized JWT for secure authentication and authorization.
